GRIFFING NURSERIES

WHOLESALE PRICE LIST

1886

"PLANT THE YEAR
'ROUND"

1930

Beaumont

Texas

A NURSERY *with* a BACKGROUND

Nearly half a century of growing fine plants in the South

In presenting this, our "Plant the Year 'round" WHOLESALE PRICE LIST, we believe we are offering the Trade the greatest values possible.

QUALITY has never been sacrificed for quantity. When you purchase from us—our organization is desirous of pleasing you.

If you have not yet joined our ever widening circle of Customer-Friends, we extend an invitation now.

Simply select what material you need from this list, mail us your order and Griffing's service will see that proper selections are made and that your order is promptly handled.

An Invitation to Visit Our Nurseries

Location

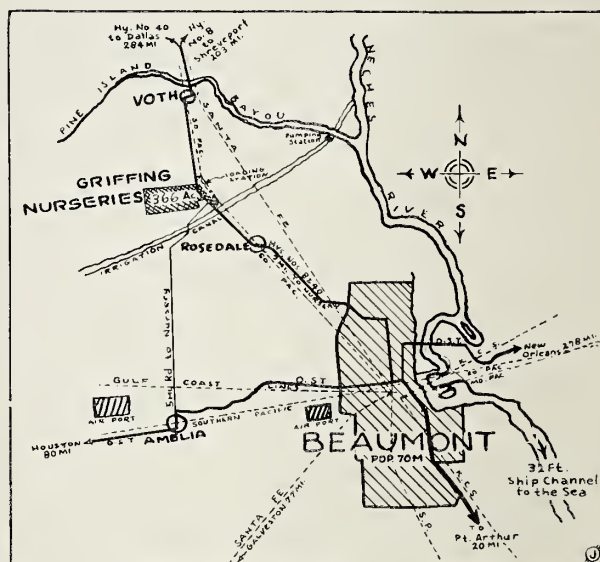

Our Nursery Plant is in a particularly favorable location. Isolated from other plantings and free from injurious insect pests and diseases.

You will find it a pleasure to visit our big Nurseries. A drive through fragrant woods over the concrete Highway No. 8 and 40 brings you to our Nurseries.

We want you to come and visit us and see our plants and trees in the nursery. We know you will say that you have never seen such fine stock and in such complete variety. You will also be interested in our test block of new varieties. A visit to us should prove both pleasant and profitable to you. Advise us when you can come.

BEAUMONT EASILY REACHED—Improved Highways each direction. Overnight Sleepers from many points.

If you arrive in Beaumont unannounced, telephone us and we will call for you; or take the Rosedale Bus, coming direct to our office, every hour on the hour corner Crockett and Main Street.

We will CREDIT YOUR RAILROAD FARE one way on a carload purchase.

This Catalog Our Leading Salesman

You Pay No Agent's Commissions When You Order Direct From Us. All Your Money Goes For Plants.
Think This Over.

Read This, Its Different

It Tells How This Price List is Made

THIS PRICE LIST CANCELS ALL PREVIOUS PRICES and contains only a partial list of the many varieties of Conifers, Broadleaf Evergreens and Deciduous Trees, Shrubs, Roses, Palms, Grasses, Vines, etc., which we are offering for sale to the Wholesale Trade (only) for the Current year.

SPECIAL NOTICE

This List is intended for the TRADE ONLY. If it reaches people NOT entitled to Trade Prices, we will thank any Nurseryman or Florist to advise us, so that our mailing list may be corrected.

Griffing Nurseries
OFFICE AND PACKING HOUSES
PRICE EACH CARLOTS

At top of each column, also Ex. Hvy. XXX, Hvy. XX all through this price list see illustrations for difference in quality by X's. It pays to buy in carlots, see Freight Rates, page No. 4.

PRICES

The Wholesale Prices in this list apply only on Carload lots or large quantities. (NOTICE! Our 1928 Average for 247 Cars was \$462.25 per car). These Carload prices will apply to large truck orders if the minimum order is more than \$450.00 given at one time and it can be dug and stored for later deliveries at Customer's risk.

ADD 20% TO PRICES

For Small quantities, less than \$450.00 minimum, add 20% to these Carlot prices to cover extra Expense of Billing, Handling and Shipping smaller orders.

TERMS OF PAYMENT

CASH ACCOUNT

(Saves you money). Cash with order before shipment, less 5%. Packing Free.

CHARGE ACCOUNTS

To customers who have established credit with us cash required within ten days from date of invoice less 2%. Our net terms are strictly payable thirty days from the first of the month following date of invoice. New accounts gladly opened upon receipt of satisfactory bank or trade references, (allowing time for investigation).

C. O. D. ACCOUNTS FREIGHT C. O. D.

Unless customers have established a credit with us we require one-third of the amount of order before making shipment, the balance may be payable at destination.

5% DISCOUNT FOR CASH AND FREE PACKING

PACKING CHARGES

Packing at cost for less than carloads. In carload lots we make no charge for packing. Where the full amount of cash accompanies the order we make no charge for packing.

FREE PACKING IN CARLOADS

B&B stock (we give the earth) it's heavy for Express or L. C. L. shipments as the rates are very high, therefore we recommend carload shipment whenever possible.

How to Use This Catalog

It is easy to find what you want in this catalog. The departments are arranged as follows:

Alphabetical Index, Inside back cover	
Coniferous Evergreens	Hedges
Broadleaf Evergreens	Everblooming Roses
Flowering Shrubs	Palms
Bulbs, Grasses, etc.	Shade Trees
Vines and Creepers	Fruit Department

OUR CONSOLIDATED GROUPING

In this Price List, we have consolidated both the Coniferous Evergreens and Broadleaf Evergreens, following as close as possible to the Eastern Growers, and also the Pacific Coast Growers Assn; and have grouped all of our Evergreens, that we offer, bushy grown plants, and those branched close to the ground into SIX GROUPS.

AS EXPLAINED PAGE 2

COMMON PLANT NAMES

We are endeavoring to use the American Nurserymen's Association "Standardized Plant Names" and to be governed by their Standardized System of Grading.

Nomenclature: We have taken great care in nomenclature listing our stock under Approved Common Names and Horticultural Varieties in Capital Letters. We also show the Scientific Names to the left of column regular type. Various synonyms or unapproved names (that stock has been called but not approved) in parenthesis.

"B&B" "BALL AND BURLAPPED"

This means when a plant is dug with a ball, and burlapped. This Ball contains all the root that grew in the earth's area. It is carefully chiseled out and ball not cracked or the soil crumbled while digging and without disturbing the roots. This ball of earth is then securely inclosed with strong Burlap and pinned with special needle pointed nails, taking up all the slack in the burlap.

See page 2 for Instructions of how its done and soil our trees are grown in.

"NB" "NOT BALLED"

Means when plants are dug with NAKED ROOTS AND PUDDLED IN THICK MUD. For N-B shipment, we exercise every precaution to see that the stock reaches our customers in good condition.

FOR (B&B) CARLOADS

It does not require very many balls to make a minimum 16,000 pound car. Large Grades from 100 to 150; medium grades 150 to 200; and small grades from 200 to 350.

RESERVE ORDERS

Stock booked or Marked by the Customer in the Nursery will be priced according to its value. This will include Specimen stock not priced in this Catalog. Deposits are to be made on this stock to assure us that it will be taken off the market.

ALL ORDERS ARE ACCEPTED SUBJECT TO PRIOR SALE

With the understanding that same shall be void should injury befall the stock from flood, drought, frost, or any other cause beyond our control.

OUR LIABILITY. We exercise all possible care to have stock well-rooted, well-grown, healthy, true to name, properly packed and shipped according to instructions. It is, however, mutually agreed between the purchaser and ourselves that our liability under the foregoing is limited in amount of the original price received. No guarantee, expressed or implied, that trees will live or grow.

Many nurseries and dealers buy and sell our stock. Trees or plants sold to nurseries or dealers must be sold by them on their own responsibility.

Freight Rates Quoted—See page No. 4

Also Tree Insurance see page 4.

The Object of this Catalog

Is to show by illustration the value and beauty of plants and to supply your general wants in Trees, Fruits, Evergreens, Shrubs, Roses, and Vines. Write us for consultations on Commercial Horticulture and Landscaping.

Over forty-four years ago we entered the nursery business here in this glorious Southland and started "building for tomorrow."

Thru the years it has been an ideal and a policy with us to "always build for tomorrow"—to furnish a superior quality of the best varieties of nursery stock—to render a service worth while—to maintain policies that made our customers of today, our customers of tomorrow.

Such building has paid us well. Today there is no nursery in this Southland that has a better reputation for square business dealing and high quality stock—none as large or with as complete a stock.

We have prospered, and we appreciate the patronage and loyalty of our customers who have, thru the years, made our success possible.

Just as it has paid us to "build for tomorrow" so will the same policy help you. Plant only the best your money can buy because tomorrow's results depend on the foundation you build today.

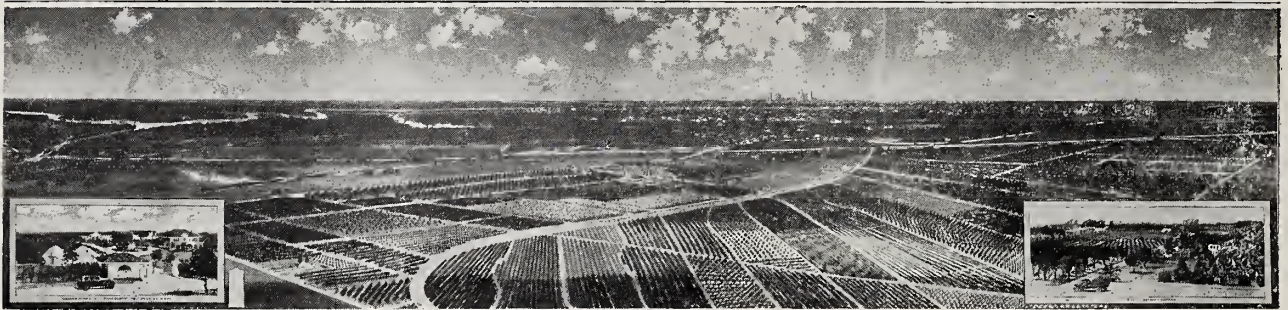

"Building for tomorrow," after all these years, has become a habit, a routine, with us and today, as always, we

strive to give you only the best that we may merit your patronage today and tomorrow.

For many years we have specialized in the production of Broadleaf and Coniferous Evergreens, probably producing more of these classes than any other Southern nursery. We have been able to determine the most hardy and suitable varieties for this section and on these we have concentrated our main efforts, that our 865 acre nursery might yield an abundance of these plants to meet the ever increasing demand.

The growing of nursery stock is a highly specialized business requiring an exact knowledge of plants and horticultural and scientific methods. After nearly fifty years of successful growing we can, without boasting, claim to be the experts in our line. Our standards are of the highest. Our plants are the finest which can be produced. Our experience enables us to offer you a valuable and practical service in selecting, planting, and caring for plants. We will be pleased to assist you in any manner we can and we are certain, from the experience of years, that you will find it pleasant and profitable to deal with us.

Here's a Panorama of Griffing Nurseries-A Place You Should Visit

A BIT OF HISTORY

Nearly 44 years have passed since the present Griffing organizations had their first inception in a small nursery plant in northern Florida on land owned by the late Father D. C. Griffing and managed by his five sons under the name of Griffing Brothers. So successful were their efforts under the Griffing Policies then adopted and since followed religiously, that their operations extended to Texas. Always the Griffings grew the stock they sold, offered the best of everything, experimented in every locality to find the most adaptable varieties, dug their trees with care, packed under rigid inspection, and in all their activities gathered and disseminated information for the benefit of their patrons.

Several years ago, State Nursery Inspection Regulations interrupted exchange of stock between branches, making it practically impossible for the extensive organization to continue under one management and made each branch an individual concern, automatically liquidating Griffing Brothers, and so was the beginning of the present nursery

organization which continues to serve you. The Texas properties were taken over by Walter C. Griffing who is now the owner of the business known as "Griffing Nurseries". The Florida properties known as the "Griffing Interstate Nurseries", is directed by Mr. W. D. Griffing.

This brief history is given to offer you assurance that your orders will have the personal attention of an organization of experienced workers gathered together in the various departments by a man who has devoted a life time to the development of perfect service, in supplying your nursery wants.

Is it any wonder that we can offer higher quality of plants, better values, and more efficient service than a smaller organization?

WHY OUR SERVICE IS BEST

In our immense concern it is possible for men to specialize and find the position for which they are best suited by nature and training and there they are much better equipped to serve than in a smaller business where varied duties must fall to each.

WHY OUR PRICES ARE LOW

With so many friends it is to our financial interest to maintain our record of nearly fifty years and realizing this, we are constantly alert to guard against errors and dissatisfaction from any source. If you multiply our volume of business by the years we have been in operation you can see the tremendous experience back of us. You gain by sending your orders to the largest concern, for we can afford less profit, giving you the difference in lower prices and better plants.

LOW GROWING COST

Do not waste your time growing inferior stock. Buy from us. We can produce it much quicker, better and cheaper than you, as we specialize in quantity production and know how, with our 44 years of nursery experience in the South.

W. C. GRIFFING

The Age of Standardization

There are standards to go by and we are religiously endeavoring to follow them, even though we lose orders on account of buyers judging price by height alone.

In every Nursery row there are several grades or quality of plants (about same heights the ordinary way of grading). We use X's and measure by standards.

Standardized Grading by X's

We wish to explain Grading by Quality as adopted by the American Nurserymen's Assn. in Chicago in 1923, which read as follows. "GRADING by quality is determined largely by height, spread and general appearance of the individual plant designated by the American Assn. X signifies good, plantable quality. XX indicates heavy grade. XXX indicates Extra Heavy (Perfect Specimens).

QUALITY PRICES LISTED

In this Price List the first column of prices quotes our prices for Extra heavy (perfect specimens) XXX quality. In the right hand column, we list Heavy XX. This XX quality is far better, and more uniformly graded than ordinarily sent out by Nurseries who do not follow Standardized Grading; but our XXX Specimens are always worth the extra money we charge for them. Occasionally we have overgrown much better than the XXX quality Nursery row run stock, for which we will quote special prices. For X quality stock, which some customers may be able to use (but not recommended by us) deduct 20% from the XX quality prices listed in Price List.

XXX XX X
PYRAMID ARBORVITAE

Showing X's. Same height. Middle one is Standard XX. Heavy grade (listed in left column throughout this catalog). The one XXX on right is listed in other column. The left plant is a X which sells for 20% off the price of XX ones.

Standardized Evergreen Groups

What it requires to grade Evergreens by groups, either Conifers or Broadleaf. The Ornamental Grower's Assn. (in the East) adopted a Commercial scale for grading Conifers in 1926. This grading was included in the American Assn. of Nurserymen's report at Denver in 1928 and The Pacific Coast Assn. of Nurserymen have a Commercial Grading of Broadleaved Evergreens, which is in a way very similar to the Commercial scale for grading and grouping Conifers in the East.

"ROMAN NUMERALS"

In this Price List, we have indicated, by Roman Numerals at the beginning of each description, of our bushy types of plants to show which group the particular variety or class of plant should be graded by.

These Six Groups are: as follows:

(I) Group No. 1 (Spreading Type)

Equals to the total measurements of the width of the plant taken each way and divided by two to figure the average. Or, 3 ft. wide x 1 ft. wide equals 2 ft. wide.

(II) Group No. 2 (Semi-spreading Type)

Equals to the width being equal to the height. Or, 2 ft. high equals 2 ft. wide.

(III) Group No. 3 (Globe or Dwarf Types)

Equals to the width being equal to one-half the height. Or, 2 ft. high equals 1 ft. wide.

(IV) Group No. 4 (Cone Type)

Equals to the width being three-fifths of the height. Or, 5 ft. high equals 3 ft. wide.

(V) Group No. 5 (Pyramidal Type)

Equals to the height being three times the width. Or, 3 ft. high equals 1 ft. wide.

(VI) Group No. 6 (Slender Type)

Equals to the height being five times the width. Or, 5 ft. high equals 1 ft. wide.

RATIO MINIMUM XX HEAVY GRADE

We have endeavored to clearly classify these groups, so as to include all the bushy growing Evergreens. The ratios mentioned are minimums, and a plant to be XX quality should not fall below the proportions given. From observation, evergreens properly spaced and grown under normal conditions will have the same ratio in the various commercial sizes.

WHERE MEASURE STARTS AND STOPS

Measurements of height, should be where the branches start, and not at the ground where the plants are leggy. Top measurements should stop where the main part of the top ends, and not at the tip of a thin shoot.

Griffing's Balling Soil

FOUND AT BEAUMONT ONLY

After years of Nursery experience in various states and localities the Beaumont soil has been selected as the best in the whole South for balling (B&B) plants.

WHAT IS B. & B.? MOVING A TREE IN THE DIRT IT GREW IN!

B. & B. has upset all traditional customs about time of planting, size that can be planted, and has eliminated years from planting time to the day when the effect is really visible.

HOW BALLING AND BURLAPPING (B. & B.) IS DONE

Look at the photographs showing the procedure of digging, lifting from the hole, and casing with strong burlap. The feeding roots are in the ball. The moisture and soil is held intact. No shock results from digging. Plants start growth more rapidly. The loss among balled plants is negligible and with proper care and attention after planting in the way of water and cultivation, there is no necessity for losing a single plant.

We do not spade them out and tie burlap around the loosened soil, but the soil is solid, never cracked.

Removing the Root System Without Shock.

No Roots Exposed to the Air. A solid compact ball.

The Dirt Can't Break Away From the Roots.

TREE INSURANCE

Last season in our Retail Catalog we offered for the First Time our Insurance Policy, on the life of Trees and Shrubs, for 20% of invoice. The offer was as follows:

"Upon payment of full purchase price, plus twenty per cent of same, we will insure the growth of such stock as we deliver against loss from natural causes for one year."

In many ways this Insurance feature has done good, especially for local sales when explained to customers, besides a great many mail order customers paid it.

ADVANTAGES: People now days insure their lives, their homes, their furniture, their automobiles; why not their Trees and Shrubs?

COLLECTIONS: We do not give policy until full amount is paid. This helps with collections.

Insurance to Wholesalers 10%

We have been so well pleased with the Retail Insurance that we are now offering Insurance on our carload wholesale orders for 10% above invoice price while the stock is in your possession for three months, if properly cared for. (After you resell it, you should get Insurance from your Clients).

TRANSPORTATION

B&B plants packed in bulk carloads travel fast and without loss.

FREIGHT RATES

Our Carload orders are shipped as "Dormant Nursery Stock" which now takes the new mileage rates since November 14, 1928, and is figured according to the number of miles and takes Class "B."

Freight Rates Reduced

Below we explain how to figure your freight charges from Beaumont. These new freight rates from the South West on a mileage basis puts our Nursery within your reach.

FOR EXAMPLE

We are tabulating below the partial schedule which shows mileage in even numbers, excess to be charged for at same rate per 100 lbs. In order to find out the rate from Beaumont simply ask your Railroad Agent the shortest mileage to Beaumont and apply the following cents per 100 lbs.

Class "B"	Miles From		For a Minimum
Per 100 Lb.	For	Beaumont	Or 16,000 Lb. Car
.15c	"	25	\$ 24.00
.19c	"	50	30.40
.23c	"	75	36.88
.26c	"	100	41.60
.32c	"	150	51.20
.35c	"	200	56.00
.40c	"	250	64.00
.43c	"	300	68.80
.48c	"	350	76.80
.51c	"	400	81.60
.54c	"	450	86.40
.57c	"	500	91.20
.62c	"	600	99.20
.68c	"	700	108.00
.74c	"	800	118.40
.78c	"	900	124.80
.82c	"	1000	131.20
.86c	"	1100	137.60
.91c	"	1200	145.60
.95c	"	1300	152.00
.99c	"	1400	158.40
1.03c	"	1500	164.80

AVOID MISTAKES

IN WRITING THE ORDER. Patrons will oblige us, and avoid possible errors, omissions and misunderstandings, by using order blank, and observing the following suggestions and terms of sale. More order blanks will be cheerfully furnished upon request.

Indicate size ordered by writing size in figures. Extend or carry out prices for each item or group of the same class having a common price.

Freight Prepaid on Carloads

REDUCED FREIGHT RATES AND QUICK SERVICE GIVEN BY THE RAILROADS

For about 10% above invoice price we are able to offer our Balled and Burlapped (B&B) Trees Freight Prepaid, for cash with orders where the gross amount for a 16,000 pound minimum carload amounts to over \$700.00, within a radius of 500 miles. Greater distances would require a greater percent (we cannot pay freight on Bulky, heavy, low priced Trees, unless the gross amount of order reaches the minimum net value per car).

Write us for special Freight Prepaid prices per tree, sending your list of possible wants and we will quote you on net cash on order Freight Prepaid and Insured Trees if you desire.

OUR FREIGHT SERVICE

From the net work of Railroads and Truck Lines entering Beaumont, very quick delivery is assured. All goods travel at purchaser's cost and at carrier's risk.

OVERCHARGE OR DAMAGED STOCK

Before accepting shipments from Carriers examine stock and if necessary get a "Bad order exception". Should there be reason for complaints, notify us immediately. We gladly give all claims consideration and assist our customers in getting refund on overcharge from Carriers.

INQUIRIES

Concerning shipments, rates, weights, sizes, etc. will be promptly and gladly answered. If you have used our material you know the value of our B&B stock. A trial order will fully convince you. Once a customer, always a customer is our motto.

IRRIGATION

Located along the largest rice canal in America (Capacity 300,000,000 gallons per day) which supplies the city of Port Arthur, the Extensive Oil Refineries and 30,000 acres of rice land with fresh water from the Neches River, the year around, we make full use of our opportunity to keep our stock in a healthy condition even during the dry-est season.

GUARANTEE

We exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name, the Griffing Nurseries shall be liable only for the sum paid for the stock which shall prove untrue, and shall not be liable for any greater amount.

NO AGENTS

We employ no agents and no dealers are authorized to use our name. We are not responsible in any way for stock repacked or resold.

LANDSCAPE SERVICE

We will be glad to submit, at cost, Landscape Plans that will help you sell your ideas. Our plans are drawn by Landscape college men who have had years of experience in Southern conditions and are well acquainted with the varieties best adapted to your section. Write us for particulars.

The nearest thing to INSURANCE you can get on TREES and SHRUBS is to buy from Griffing Balled with Rosedale Balling Soil.

Coniferous Evergreens

The Aristocrats of
the Garden

CONIFEROUS EVERGREENS are the tall cone-bearing evergreen trees. They include many varieties, among which are the Arborvitae, Cypress, Junipers, Pines, etc.

The special advantage in these evergreens lies in the fact that they are suitable for most any space and adaptable to almost any shape or size of building.

They keep their beauty the year around.

The conifers should always be handled B & B. And when handled Balled the Griffing way, grow off with universally pleasing results.

ALL Conifers and Broadleaf Evergreens are grown from grafts or cuttings, which will make them true to name and type unless otherwise stated.

Arborvitae (Biota)

Thuja Orientalis

Many people prefer Arborvitae on account of their formal, symmetrical shapes and as they are such widely varying types, even as to shape and color, they make groupings for various locations so that they are indispensable as there is some kind suitable for every landscape use.

There are two types of Arborvitae known as Occidental and Oriental. The Occidentals are generally not suited for Southern states, while the Oriental or Chinese types all do well in the South. The Oriental type is also classed as (Biota) which is now unapproved.

GRIFFING'S DWARF GREEN (Biota)
See Daily Dwarf**GRIFFING'S UNNAMED SHORT STOCKY TYPES** (Biota) T. or. compacta

(IV) Out of our 38 choice selected numbers, there are three or four types of short, compact, well filled-in growth, very worthy of planting in place of many named types.

B&B.....	4	to	5	ft. high.....	\$3.00.....	\$2.25
B&B.....	3½	to	4	ft.....	2.25.....	1.75
B&B.....	3	to	3½	ft.....	1.75.....	1.35
B&B.....	2½	to	3	ft.....	1.10.....	1.10
B&B.....	2	to	2½	ft.....90

GRIFFING'S UNNAMED MEDIUM SLENDER TYPES (Biota) T. or. semi-pyramidalis

(V) Out of our 38 choice selected numbers, there are several types of light to dark green foliage of medium or slender growth worthy of planting in place of Bakers.

B&B.....	6	to	7	ft. high.....	\$4.25.....	\$3.75
B&B.....	5	to	6	ft.....	3.75.....	2.75
B&B.....	4	to	5	ft.....	2.00
B&B.....	3	to	4	ft.....	1.25

GRIFFING'S UNNAMED SLENDER TALLER TYPES (Biota) T. or. pyramidalis

(VI) Out of our 38 choice selected numbered types there are several tall, slender, dark to light green preferable to Italian Cypress for accent planting.

B&B.....	7	to	8	ft. high.....	\$4.25.....	\$3.75
B&B.....	6	to	7	ft.....	3.75.....	2.75
B&B.....	5	to	6	ft.....	3.00.....	2.00
B&B.....	4	to	5	ft.....	1.25

HUDGINS'S (Biota) T. or. hugini

(IV) Originated by Hudgins of Georgia. Very compact, bluish-green, feathery foliage, branches close to the ground. Foliage open enough to allow sunlight and air to penetrate, so it is green to the center, thus making one of the choicest compact blue-green arborvitae.

B&B.....	4	to	5	ft. high.....	\$2.75.....	\$2.10
B&B.....	3	to	4	ft.....	2.10.....	1.60
B&B.....	2½	to	3	ft.....	1.50.....	1.00

Ex. Hvy. XXX Hvy. XX

MELDENSIS (Biota) T. or. meldensis

(III) Compact, rounded and symmetrical. Distinct and pleasing shade of bluish-green.

B&B.....	3	to	4	ft. high.....	\$2.00.....	\$1.35
B&B.....	2½	to	3	ft.....	1.60.....	1.10
B&B.....	2	to	2½	ft.....90

MINATURE (Biota)—See Minute**MINUTE** (Biota) T. or. minature

(V) Most minute arborvitae known. Very compact, rich green fine foliage.

B&B.....	18	to	24	in. high.....	\$3.25.....	\$2.50
B&B.....	15	to	18	in.....	2.50.....	2.00
B&B.....	12	to	15	in.....	1.75

MURRAY (Biota) T. or. murray

(VI) Fine feathery foliage, compact, medium upright growth.

B&B.....	5	to	6	ft. high.....	\$4.50.....	\$3.75
B&B.....	4	to	5	ft.....	3.25.....	2.50

RAMSEY HYBRID (Biota) T. or. cupressifolia

(VI) A tall, fast growing pyramid, with thread-like foliage, yellowish green in color. A tree of exceptional merit for the Southern States. Withstands drought and heat.

B&B.....	7	to	8	ft. high.....	\$11.00.....	\$7.75
B&B.....	6	to	7	ft.....	8.50.....	6.00
B&B.....	5	to	6	ft.....	5.75.....	4.25
B&B.....	4	to	5	ft.....	3.00
B&B.....	3	to	4	ft.....	2.00

ROENA (Biota) T. or. roenae

(VI) Tall cone shape pyramid, very compact, narrow with light green foliage.

B&B.....	6	to	7	ft. high.....	\$6.00.....	\$4.50
B&B.....	5	to	6	ft.....	5.00.....	3.75
B&B.....	4	to	5	ft.....	4.25.....	3.25

ROSEDALE (Biota) T. or. rosdale

(III) Feathery, blue green foliage, with rounded, upright shape.

B&B.....	4	to	5	ft. high.....	\$3.00.....	\$2.00
B&B.....	3	to	4	ft.....	2.25.....	1.50
B&B.....	2½	to	3	ft.....	1.80.....	1.20
B&B.....	2	to	2½	ft.....95
B&B.....	18	to	24	in.....75
N-B.....	2	to	3	ft.....60
N-B.....	18	to	24	in.....40

SIKES (Biota) T. or. sikesi.

(VI) Tall, very fast growing. Bright green pyramid, very narrow. Good substitute for cypresses. Does not burn at bottom.

B&B.....	8	to	9	ft. high.....	\$7.50.....	\$6.50
B&B.....	7	to	8	ft.....	6.50.....	5.50
B&B.....	6	to	7	ft.....	5.50.....	4.50

BROADLEAF EVERGREENS

Ideal for Foundation Planting

"Broadleaf Evergreens" derive their name from the flat leaf. They are distinguished from the conifers also by their switchey branching appearance.

Balled Cape Jasmies Bloom the First Year

All Palms, Evergreens, Conifers, Shade Trees, and Flowering Shrubs are greatly benefited by handling B&B. Give your plants a fair deal.

They are particularly suitable for foundation planting, serving to hide undesirable and ugly places in the foundation of the house.

Unlike other plants and flowers which are pretty only during certain seasons of the year and have to be replaced annually, these Broadleaf Evergreens look attractive at all times.

Broadleaf Evergreens have received our close attention for years and many highly desirable older types have been brought to the front and many others introduced by our efforts.

Many distinguished Landscape Artists have often remarked after seeing our choice collection, "If we had these beautiful Broadleaf Evergreens we should want nothing better to make complete plantings with. Such a variety."

Our Glossy Privet (*Lucidum*) will make choice plantings by themselves, both for shape and color of foliage: besides all the other varieties of broadleaf plants we are listing below. The landscape artist only needs to be familiar with this valuable group to carry out his planting ideas for year round effects. Many of these varieties are hardier farther North than they are usually supposed to be.

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

Abelia

ABELIA GLOSSY

A. grandiflora

(III) A graceful shrub of great beauty, with its long arching stem, clothed with dark green foliage. Small tube-like white flowers, shaded pink are borne profusely throughout the year.

B&B.....	4	to	5	ft. high.....	\$1.75.....	\$1.25
B&B.....	3	to	4	ft.....	1.30.....	1.00
B&B.....	2	to	3	ft.....	.90.....	.70
B&B.....	18	to	24	in.....	.80.....	.60

Abelia and Cape Jasmine rich in fragrance and romance, are favorites for their waxy white blossoms. They are very desirable in a group with other shrubs because they seldom outgrow their place.

CAUTION: Never lift small B&B stock by the top or branches. Lift the ball itself by grasping it with both hands, so as not to loosen roots in the ball.

Broadleaf Evergreens—Continued

Azalea

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

FORMOSA AZALEA

A. indica formosa

(II) Evergreen type; admired for its large purplish-pink flowers. This azalea thrives best in rather acid soil, leafmold or pond muck, with little or no manure. The flowers last in perfect condition a long time, and are wonderfully colored.

B&B	2	to	2½ ft. spread	\$3.25	\$2.50

N-B	2	to	3 ft.	.25	

Camphor Hedge Is Evergreen and Offers Exquisite Color.

Cassia

FLOWERY SENNA (Floribunda)

Cassia corymbosa

(VI) A very rapid grower, with bright green divided leaves, and clusters of bright yellow flowers appearing in the Summer and Fall.

WILD SENNA (Sesbania purple)

Cassia marilandica

Leaves small, light green on surface, glaucous underneath. Flowers bright red purple, very showy.

B&B	4	to	5 ft. high	\$.75	
B&B	3	to	4 ft.	.55	
N-B	4	to	5 ft.	.35	
N-B	3	to	4 ft.	.25	

See Page No. 2 - For Standardized Grading and Balling Soil

Reading from left to right as shown in picture: Oleander, Abelia, Crape Myrtle, Coral Berry, Bigleaf Privet, and Pittosporum.

Camellia

GORGEOUS mid-Winter flowers, and desirable on account of their large waxy stunning appearance when other flowers are not blooming. Varying colors also unusual. Extremely slow grower and hard to propagate but keenly desired by all who know them.

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

CAMELLIA

Camellia japonica

(V) We offer these very popular and beautiful shrubs, in pink, red, variegated and white. The flowers are showy and wax-like, very much admired in winter. "For specific colors double prices quoted below."

B&B	12	to	15 in.		1.25

Cape Jasmine

GARDENIA

An old Southern favorite shrub with attractive glossy green leaves and masses of waxy white blossoms, very fragrant. Cut flowers are exquisite. Cape Jasmines grow outside in the South, except on land that has excess lime or alkali. Blossoms highly valued in the North where it is known as Gardenia, to which romantic authors have referred so frequently.

FLORIDA CAPE JASMINE

G. grandiflora

(III) This variety is commonly known as "Cape Jasmine." Blooms very profusely during latter part of May.

B&B	4	to	5 ft. high	\$1.70	\$1.00

B&B.....	12	to	18	in.	1.25.....	1.00

Elaeagnus

The Elaeagnus group contains a number of fine Evergreen Shrubs. The varieties which we offer are very desirable types and should be planted more extensively. The growth is very striking with contrasting color in the foliage; generally the inner part of the leaf is a shining silvery, while the tops of the leaves are of a dark green. The stems are mostly fawn colored. In different varieties the stem and leaves vary in size and form and the colors change throughout the growing periods. Older plants produce edible fruit.

BROADLEAF ELAEAGNUS *E. macrophylla*

(Grafted)

(III) Large, medium green leaves, silvery underneath, with new growth and stems fawn colored. Rather compact, fast grower.

SIMON ELAEAGNUS *E. pungens simoni*

(Grafted)

(III) Its small leaves are dark green and dotted with silver scales on the upper surface; silvery underneath. Younger foliage and stems are light fawn velvety appearance.

Firethorn

(Crataegus, Evergreen Hawthorne)

This group often times referred to as Crataegus, belongs to the evergreen Hawthorne. *Pyracantha* is a Greek word meaning Firethorn. They are exceedingly valuable for a great wealth of bright colored berries, which they furnish in Fall and Winter, and which remain on the plant for many months.

PYRACANTHA

LALAND FIRETHORN (Seedling) *P. lalandi*
(Burning Bush) (*Coccinea* type)

(III) The most gorgeous of all *Pyracantha*. Of spreading upright growth producing masses of orange colored berries in great profusion throughout the winter months. Leaves a dark green.

B&B.....	4	to	5	ft. high	\$5.50.....	\$3.50

"B & B"

How It Is Done

Two views showing how carefully Griffing's men shape the balled earth and sew it into the bur-lap.

After a careful search of many choice locations we placed our Nursery at Rosedale. Here we found an ideal soil, moist and rich, ideal, too, for digging plants under the B&B method.

We grow our young stock in good upland soil and transplant them in the heavy Rosedale Balling Soil, pruning the roots in the process. This develops a thick compact root or feeding system on Griffing Plants and is one of the reasons why our trees and plants are so hardy and beautiful.

Jasmine

JASMINUM

Not ordinary Cape Jasmine or Gardenia, but Weeping Vine like Shrubs. Dark green foliage. The Nudiflorum has striking effect with its gorgeous yellow blossoms on stems before leaves appear. The Primulinum has large yellow flowers earlier in the Spring. Its weeping growth and dark green foliage make it available in many places. The Florida is the best all 'round, shiny leaf variety; blooms throughout the Summer.

While our prices are as low as any, yet our aim is not to be the cheapest; value is our big consideration and aim. We could reduce nurturing costs and, consequently, selling prices, but that would not be giving Quality and Value.

Magnolia

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

SOUTHERN MAGNOLIA

M. grandiflora

The well known Magnolia of the South, making a large, stately tree in time, although of slow growth. Has beautiful dark green, heavy, shining foliage, and in the Summer, produces magnificent large, pearly white flowers, 6 to 8 inches across; intensely fragrant. A lovely street or specimen tree. Hardy.

PRIVET (*Ligustrum*)

The Finest Broadleaved Evergreen

The word "Ligustrum" refers to the entire family of Privets which is by far the largest and best group of Broadleaf Evergreens. Varieties differ widely in size, shape, habit of growth, and color.

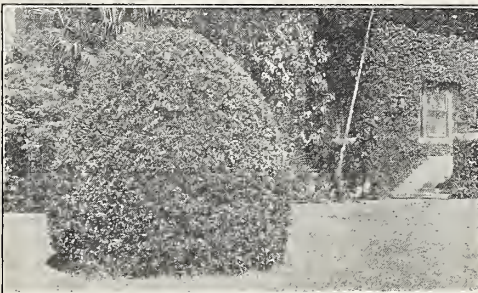

Large and small leaves, dark and light green, brilliant gold and mottled effects all combine to give perfect appearance to the plantings of Privets. Beautifully trimmed hedges or high, informal screens are rapidly formed by some varieties.

Fragrant white flowers are borne in spring and black fruit follows, remaining on the plants during winter, in medium and large clusters like wild grapes.

This group cannot be so extensively planted and is in such variety that it will fill practically every need. We recommend the types listed here as being the most generally perfect ornamental grown and ones that will give universally pleasing and satisfactory results.

The glossy-leaf type (*Lucidum*) we have selected from thousands of seedling lucidums, several varieties of which we have given descriptive names. All of which have indispensable merit.

These varieties are the Waxleaf, Crinkleleaf, Pyramidal, Upright (*Erecta*), Blackleaf and Graceful.

Sheared Griffing's Waxleaf Ligustrum

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

CHINESE UNSHEARED PRIVET *L. sinensis*

(V) A large graceful shrub, with horizontal, feathery, fern-like foliage, and light green leaves.

Camphor Winbreak

Climbing and Creeping Vines

BOUGAINVILLEA

(Brasiliensis)

B. spectabilis

Vigorous, woody vine, evergreen, leaves a mass of brilliant reddish-purple flowers against a background of bright green leaves.

CORAL VINE

See Rosa de Montana

ENGLISH IVY

Hedera helix

Thick leathery green leaves; good ground cover, thrives in shade.

FICUS REPENS—See Fig Vine

FIG VINE

Ficus repens

Small dark green heart-shaped leaves making a mat of foliage against a building.

HEDERA HELIX—See English Ivy

ROSA DE-MONTANA

Antigonon leptopus

(Coral Vine)

Leaves heart-shape; producing larger racemes; beautiful rosy pink flowers.

From 2½ inch Pots.....	.30.....	.20

TREATMENT OF VINES

Do not allow your vines to cover entirely a well designed doorway or window. Let them frame the good features of the house and cover its architectural defects. Training or trimming should be shrewdly done to keep the naturalistic effect, which vines give to planting.

CAROLINA JASMINE Gelsemium sempervirens

An evergreen native climber with dark green pointed leaves. Rapid growing, bearing great profusion of golden yellow blossoms in early spring.

HALL'S HONEYSUCKLE

Lonicera Japonica halliana

Vigorous evergreen climber. White flowers changing to yellow.

JASMINE (Vines)—See Jasmine in Evergreen Shrub Department.

PAINTED TRUMPET

Bignonia speciosa

Hardy, woody vine. Orange scarlet flowers of trumpet shape.

WOODBINE

Lonicera periclymenum

Very attractive red blossoms similar to Honeysuckle.

WISTERIA

Wisteria chinensis purpurea

Hardy vine for pergolas. Drooping clusters of fragrant purple blooms.

Deciduous Shrubs

In this group are the great majority of brilliant flowering shrubs. Even their bareness in winter months fails to discredit their beautiful fresh spring foliage and the gorgeous many-colored blossoms. Varieties may be selected to give wealths of bright-colored flowers from very early spring until frost. Should always be included in plantings.

Pruning of this class of shrubs after the blooming season always improves them, making a more bushy plant with increased number of blossoms. Do not prune when dormant, as this frequently spoils their chance for blooming.

DECIDUOUS SHRUBS—Continued

RED CRAPE MYRTLE—Griffing's Red is different from the ordinary reds offered by others; try them; "they speak for themselves."

Crape Myrtle

LAGERSTROEMIA INDICA

8 to 12 feet. Favorite flowering shrub of the South, hardy and heavy bloomer, it paints the landscape in summer months with its brilliant blossoms in tones of crimson, red, pink, purple, and other shades. Frequently termed the "Lilac of the South." As a shrub to alternate with street trees they have met with favor.

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

GRIFFING'S WATERMELON RED CRAPE MYRTLE

L. i. watermelon rubra

(V) Brilliant watermelon red. Flower heads exceptionally large and fluffy, making a gorgeous display. Recognized as the finest and best Red Crape Myrtle on the market, superior in color to any other Red Crape Myrtle offered by other Nurseries.

Shrubs Assorted

Group of Flowering Shrubs described and priced below.

SYMPHORICARPOS VULGARIS

See Coral Berry

SNOWFLAKE DEUTZIA

D. scraba candidissima

White blossoms appearing in Spring.

PRIDE OF ROCHESTER DEUTZIA

D. scraba

Pink blossoms appear in early Spring.

WHITE DOGWOOD

Cornus florida

Sturdy, small tree or shrub. Large white flowers.

RED-OSIER DOGWOOD

C. stolonifera

Shrub to 8 ft., usually with dark blood-red branches.

ORANGE

Citrus trifoliata

Foliage glossy green, deciduous and hardy, but retaining green stems and branches during Winter. Its thorns make an ideal defense hedge.

JAPANESE QUINCE—See Flowering Quince

JERUSALEM THORN

Parkinsonia aculeata

(Retama)

A showy ornamental tree with smooth bright green bark, reed-like branchlets to take the place of leaves with bright yellow flowers.

FLOWERING POMEGRANATE

P. granatum

Bushy shrub with glossy foliage; either bright colored blossoms; either singles or doubles, white, red and variegated varieties.

PARKINSONIA ACULEATA

See Jerusalem Thorn

PUSSY WILLOW

Salix discolor

Catkins used by florists in spring.

RETAMA—See Jerusalem Thorn

FLOWERING QUINCE

Cydonia japonica

(Japanese Quince) and (Firebush)

Branches covered in early spring with bright semi-double, rosy-red flowers.

SALIX DICOLOR—See Pussy Willow

VAN HOUTTE SPIREA

S. van houtte

(Bridal Wreath)

Flowering shrub; drooping branches; white blossoms.

VITEX AGNUS CASTUS—See Chaste Tree

Japanese Bamboo

Bamboo and Grasses

AND MISCELLANEOUS PLANTS

The beautiful, graceful plants are of the greatest value in landscape planting. They are entirely hardy, easily grown, give beautiful effects and fill large spaces. No other plants make such a big display for the low cost. In shrub borders, for backgrounds, screens, hedge rows, etc., or for fine big specimens on the lawn they answer every demand. We have ideal conditions for their production and offer fine, rich colored, vigorous plants.

Eulalia Grass

BANANA

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

COMMON BANANA *M. sapientum*

Fruiting banana from Florida. Gives a decided tropical effect when used with Spanish architecture.

B&B.....	Large Division	\$2.00.....	\$1.50
B&B.....	Medium Division	1.50.....	1.25
B&B.....	Small Division	1.25.....	.80

BAMBOO

FEATHER BAMBOO *B. vulgaris*

Large, graceful variety with green stems, and foliage of feathery appearance.

GOLDEN BAMBOO *B. vulgaris aurea variegata*

Stems golden, penciled with green. Foliage green.

NINGALA BAMBOO *Arundinaria falcata*

(Dwarf Bamboo)

A broad, spreading, low growing bamboo with graceful arching branches, and finely divided compound leaves, making a lacy, weeping, fern-like effect.

SILVERSTRIPE BAMBOO

B. arundinaria simoni

Silver or white stripe in leaf, otherwise like the Feather variety.

FOUNTAIN GRASS

FOUNTAIN GRASS *Pennisetum ruppeli*

Dwarf grass, growing 18 inches tall, with beautiful white plumes. Fine for bordering.

EULALIA GRASS

STRIPED EULALIA *M. s. variegatus*

Very airy, and graceful; pin stripes lengthwise of the blades.

ZEBRA GRASS *M. sinensis zebrinus*

Very airy, and graceful; white bars cross-wise of the blades.

PAMPAS GRASS

PAMPAS GRASS *Cortaderia agrentea*

Beautiful white plumes, light green foliage, gracefully recurved. Makes large clumps. In summer sends up tall silvery plumes, which are very distinctive and beautiful.

MOCK PAMPAS GRASS

Erianthus Ravennia

Resembling genuine Pampas but not as desirable.

PINK PAMPAS GRASS

Cortaderia "Roi des Roses"

Similar to above except for color of plumes which are a faint lavender-pink color.

Shade and Ornamental Trees

Tallow Tree

THE SUN is hot in the South. Shade trees are a necessity and comfort as well as for adornment. We specialize in the rapidly growing shade trees of graceful shapes that serve to beautify as well as to break the glaring light of the Southern sun.

Those interested in promoting Home Site Additions should get in touch with us, as shade trees properly chosen and planted make selling a simpler problem.

We have listed the best medium and large growing trees suitable for shade and street planting.

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

Ash

ARIZONA ASH

Fraxinus velutina

Of medium size for either street or lawn purposes. Clean growth, no leaf littered lawn. Trunk very straight, covered with grayish-white smooth bark. Foliage dark green, very glossy; remaining on healthy trees until freezing weather.

Palms for Tropical Beauty

Nothing makes our Southern towns more invitingly tropical especially in the eyes of our Northern visitors, than the palms, at home in our mild climate. Lofty palms lining an avenue suggest stability and dignity. A careless grouping of palms with other evergreens makes an effect of luxuriance that nothing else can create.

The number of kinds of palms makes variety possible if one fancies a real palm grove. Their broadfanlike leaves afford shade without obstructing the breeze. Planted so that their mature foliage just meets, they make a cool, inviting spot, never marred by falling leaves.

Our palms grow very stocky in the heavy black land, having strongly developed leaves and large thick, pronounced trunks. More leaves according to caliper than on the palms grown in the more southern sections where development is quick and very tender. The same grades we offer when compared with others we have seen are worth three times as much.

One of our chief specialties is Palms. During our years of experience in handling nursery grown palms from open ground, we have settled on a system of lifting them with a ball of earth (Palms cannot be handled bare-rooted), and from 40 to 60 per cent of the leaves are cut off when

dug. Never remove burlap when planting. After new growth starts, fertilize liberally with stable manure and water freely and your Palms will give pleasing results.

Although the palm is tropical, its range is not so limited as some believe. For 150 miles from the coast, Texas and Louisiana may vie with California and Florida in growing palms. Even in Fort Worth and Little Rock some varieties live comfortably with little protection.

METHOD OF MEASURING

Palms are measured and graded by the thickness or diameter of the trunk where it protrudes from the ground.

Griffing's Palms are known throughout the South as the Very Best Specimens.
They have increased property value in ten states.

PALMS—Continued

Price Each in Carlots
Ex. Hvy. XXX Hvy. XX

BLACKBURN PALMETTO PALM

Sabal blackburniana

Perfectly hardy, standing a temperature nearly zero. Large specimens known as far north as Arkansas. Large Fan Leaf variety; native of the Southern Coast. A particular feature of this variety being the fact that it holds its green trunk effect.

	Caliper		Approx. Height		
B&B.....	5	to 6 in.	5	to 6 ft.	\$4.70.....\$3.50
B&B.....	4	to 5 in.	4	to 5 ft.	3.50.....2.50

B&B.....	2½	to 3 in.	2½	to 3 ft.	2.50.....1.80

Washington Palms for Shade

Palms are sentinels of plant life in the arid regions of the South. No plants lend such a sense of majesty and dignity to the landscape when once the larger varieties attain mature age. Those that we list are best varieties adapted for planting in the Southern States.

ROSES

Southern Grown Roses for Southern Planters

THE softest spot in the heart of a bride who begins her new home life is or should be for her husband. The next is usually for her roses. What is a home without roses?

In poetry and prose our literature has described the beauty of the blooming rose.

To have success with roses, one must buy them from the nursery man who has given his attention to selecting the varieties suited to the climate and soil where they are to flourish.

For many years, we spent our efforts on hundreds of varieties, but for some years now, we have concentrated on cultivating a few of those varieties best adapted to Southern climate and soil.

They cannot adapt themselves to climate and unfavorable soil conditions on their own roots. For this reason, the desirable varieties are carefully bred to flourish in certain localities and are grafted on sturdy roots of Odorato and Canina Root stocks. Unless you wish to experiment, buy roses from a grower who has had many years experience.

Griffing's Roses are known throughout the Southern states for their high quality and productiveness. Every one of our bushes is field grown on low budded, non-sprouting stalks and are varieties especially adapted to the coast country.

GRIFFING'S EVERBLOOMING ROSES

Throughout the South Griffing's Roses have been the choice of thousands for forty years. In recent years we have propagated a limited list, including those with which the average home grower can usually have splendid success. Our long experience has shown us that while every variety of rose has some difference, a list of two or three dozen varieties usually includes those accepted as standards and gives ample range of choice in colors, and other characteristics.

CLASS "A" ROSES

- COLUMBIA—(H. T.) Large; peach-blow pink.
 CLIMBING PINK RADIANCE—(Cl. H. T.)—Best pink climber; flowers beautiful, and last well. (Double price).
 ELLEN POULSEN—(D. Pol.) Bright cherry pink; fragrant double flowers.
 JOSEPH HILL—(H. T.) Salmon yellow with pink edges.
 JOHNKEER J. L. MOCK (H. T.) Clear imperial pink.
 LADY HILLINGDON (T.) Deep apricot yellow to orange.
 LUXEMBOURG (H. T.) Apricot yellow. Excellen for cut flowers.
 LOUIS PHILIPPE (Beng) Everblooming, rich velvety crimson.
 MARECHAL NEIL (Cl. H.) Yellow, well known. (Double price.)
 MME. CAROLINE TESTOUT (H. T.) Large, brilliant, satiny roses, bordered with silvery-rose.
 MME. JOS. SCHWARTZ (T) Silvery white shaded with pink.
 MME. JULES GROLEZ (H. T.) Bright rich, rosy red blooms.
 MRS. CHAS. BELL OR "SHELL PINK RADIANCE" (H. T.) Shell pink on salmon background.
 MRS. DUDLEY CROSS OR HELEN GOOD (H. T.) Creamy white, with delicate edging of carmine. Thornless.
 MRS. ROBERT PEARY (Cl. H. T.) Ivory white. large, full and fragrant. Best for cut roses.
 RADIANCE (PINK) (H. T.) Rosy carmine with silver tint; large full and fragrant. Best for cut flowers.
 RADIANCE (RED) (H. T.) Clear red; beautiful in bud and flower.
 RADIANCE (SHELL PINK) See Mrs. Chas. Bell
 SUNBURST (H. T.) Rich, coppery yellow, delicate grower. (Double price.)

Griffing's Black-waxy Rosedale Balling Soil has saved the life of many trees and plants. (Perhaps some of our customers too.)

Fruit Department

Merritt Mulberries

GROW your own fruit" has become a popular slogan. And there is no excuse for failing to have a few trees bearing peaches or plums in every yard. They make splendid shade in the back yard and provide fruit that would have to be bought and usually at high prices.

Our fruit trees are cheap and easily raised as they have been properly cared for during their early growth.

A small assortment of fruit trees can find room on even a small lot, and will provide a continuous supply if the varieties are wisely chosen.

ORCHARDS

The land that will produce the best farm crops will also produce the best Orchards. Your trees will not produce unless the soil and drainage conditions are right.

Young Fig Tree With Fruit

Mulberries

MORUS

BLACK ENGLISH—A small prolific bearer, ripens early.

HICKS EVERBEARING—Enormous bearer.

MERRITT—Earliest variety, large and full.

NEW AMERICAN—Tree with fine, large leaves; produces large, black fruit.

RUSSIAN—Long bearing season; everbearing; small size.

STUBBS—A well known and good variety.

Pecans

Hicoria Pecan

Governor Hogg selected this tree to mark his grave.

CULTIVATE WELL AND GET RESULTS

If you want the best results it is imperative that you fertilize, spray and cultivate your trees well.

Grafting is a mystery to many people. Briefly explained, Pecan nuts do not come true from seed. Vigorous growing seed are planted and branches of trees of a known variety are grafted on the seedling roots. It is then assured that the tree will bear nuts like its parent.

BRADLEY—The Bradley is liked best on account of richness of meat. Shell, thin, easily cracked. Comes into bearing younger, and more prolific than most other varieties.

BIG "Z"—Shell, thin, kernel, rich, yellow, crisp, and of fine flavor. Very early, and prolific bearer.

FROTSCHER—Thin shell. Splendid cracking qualities

MONEY MAKER—Early maturity, and heavy producer. Nuts uniform in size.

SCHLEY—Thrifty, strong; kernel plump; superior in richness of flavor and appearance.

STUART—Symmetrical growth, regular bearer; uniform in size; large and plump; well filled.

SUCCESS—Size large to very large; shell moderately thin; kernel usually plump; quality rich; flavor good.

FREE: SPECIAL BOOK ON PECANS. No. 66.

THE SATSUMA ORANGE

Citrus Fruits

CITRUS trees in general are evergreen and grow at all seasons of the years. The Citrus trifoliata is deciduous, and becomes dormant in winter. For this reason the Satsuma and various other citrus fruits are grafted on the Citrus trifoliata root, which causes them to likewise acquire a dormant period during the winter months when they are far more resistant to cold.

Citrus trees should be low branched. Experience has proved that orange trees branched close to the ground allows you to bank dirt among the limbs during Winter months and to shade the sun from the body when frost is in it. (Sun splits the bark.)

Our low branched trees are sold according to "Caliper size at the bud," with only approximate height.

Four Year Old Satsuma Tree Loaded With 500 Fruits

KUMQUATS or Kinkan orange

MEIWA—Sweetest, round. Best for eating purposes. Thornless.

NOTICE: The price of Kumquats double other Citrus Fruits.

SATSUMA IMPROVED Oonshiu (Bud Selected)

The early market Orange for the Coast sections. Hardest oranges known. On Citrus Trifoliata root, Satsumas are being grown commercially. Begins bearing the second year. Fruit medium size, flattened; color deep orange; flesh fine grained, tender, juicy, sweet and delicious. Seedless and thornless.

ROUND ORANGES

LUE—Known as Lue Gim Gong. Said to be hardy, and holds fruit all season.

VALENCIA—Best late California Orange. Called "Sunkist."

WASHINGTON NAVEL—The famous California Orange.

LEMONS

C. limona

MYERS—A very new variety introduced by U. S. Government. Hardy, and better than the ordinary commercial lemons.

GRAPEFRUIT

C. Grandis

MARSH SEEDLESS—This is the best and most satisfactory variety as it has a mild, sweet flavor most people prefer.

All Citrus budded on Citrus Trifoliata root.

SYSTEM OF STANDARDIZED GRADING

In grading Evergreens by Quality, we have endeavored to follow the system adopted by the American Nurserymen's Association in 1923, reading as follows: "GRADING by quality is determined largely by height, spread and the general appearance of the individual plant designated by the American Association. X signifies good, plantable quality; XX indicates heavy grade; XXX indicates extra heavy perfect Specimens.

Explanation of Groupings

We have consolidated the Coniferous and Broadleaf Evergreens so as to follow as close as possible the system of the Eastern Growers and Pacific Growers Association. Thus grouping all of our Evergreens offered in bushy plants or branched close to the ground into SIX GROUPS.

- (I) SPREADING TYPE like Pfitzer Juniper.
- (II) SEMI-SPREADING TYPE like Griffing's Waxleaf Ligustrum.
- (III) GLOBE or DWARF TYPE like Berckman's Golden Arborvitae.
- (IV) CONE TYPE LIKE Spiny Greek Juniper.
- (V) PYRAMIDAL TYPE like Upright Ligustrum (Erecta).
- (VI) SLENDER TYPE like Ramsey's Hybrid Arborvitae.

UPRIGHT LIGUSTRUM ((ERECTA)

Group (V)—Pyramidal Type—The height is three times the width for XX grade.

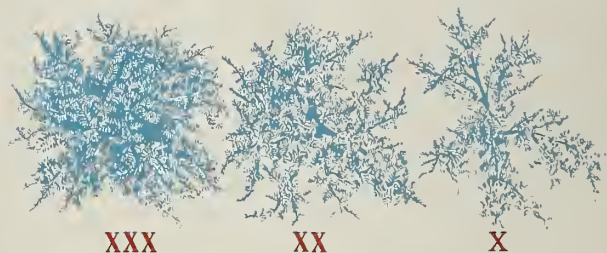

Special Illustration of Quality

NOTICE, the difference in the X, XX, and XXX, quality of plants by illustrations.

X is plantable quality.

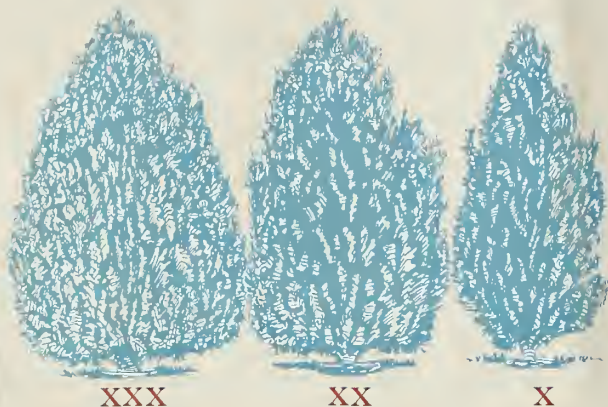

XX is heavy quality.

XXX is extra heavy quality (perfect specimens).

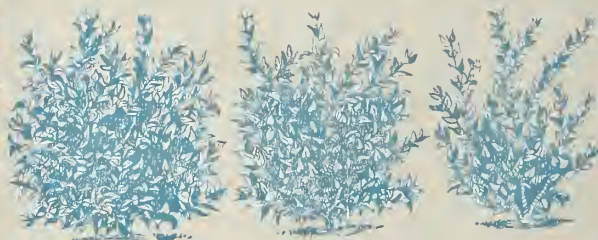

PFITZER JUNIPER (Downward view)

Group (I)—Spreading Type. The width both ways divided by 2 gives the grade for XX quality.

BERCKMAN'S GOLDEN ARBORVITAE

Group (III) Globe or Dwarf Type---height is twice the width for XX quality.

GRIFFING'S WAXLEAF LIGUSTRUM

Group (II) Semi-spreading Type—The width is the same as the height for XX quality.

For further details, please write and we shall be glad to write full regarding the above.
